

PROBABILITY AND RANDOM PROCESSES FINAL EXAM

KEIVAN MALLAHI-KARAI

The following document contains important information about the final exam of Probability and Random Processes course to take place December 2022. The same rules apply to the make-up exam in January 2023.

- I The exam is 120 minutes long and is composed of two parts.
- II The first part (e-exam) is a multiple choice test and is 90 minutes long. You can only work on this part during the designated time. The second part of the exam is 30 minutes long. You can start working on this part as soon as you have finished the electronic part.
- III The electronic component consists of 20-25 questions and is worth 70 points. Each question can have one or more than one correct answer. In the latter case, all correct answers must be chosen. Giving incorrect answers to some questions might incur negative points. Precise guideline will be provided in the exam.
- IV The e-exam be graded automatically and the grade only depends on choosing the correct answers. You do not need to show your work, nor will your work done on paper be checked.
- V During the first 90 minutes of the exam you are not allowed to leave the room.
- VI The remaining 30 minutes of the exam is similar to a regular test in which you will need to solve problems and show your work. If you simply write correct answers without carrying out the necessary steps for arriving at them, you receive no points. You may start this part as soon as you are done with the e-exam. This part of the exam is worth 30 points.
- VII You can use a one-sided A4-sized cheat-sheet. This has to be handwritten and prepared by yourself and has your name on top of it.
- VIII Aside from one regular watch, you are not allowed to have any electronic devices (smart phone, calculators, smart watches, etc.) with you during the exam.
- IX You will be provided with scarp paper. Aside from the cheat-sheet you are not allowed to bring in any additional paper with you.
